

Digitalize pH Analysis with **Global's** all New **Digilog pH Meter** with in-built storage of calibration data

'Digi' represents all the features of digital pH Meter and 'Log' represents the connectivity with standard analog electrode which will drastically reduce the replacement cost of electrode and logging of your calibration data

Smart Features:

- Works with any analogue pH Electrode which will reduce the replacement cost
- Data Management: in-built storage of calibration data
- RS 485 or 4-20mA output for connecting to HMI or integrating with SCADA
- Auto-buffer recognition
- Available in Certified Flameproof Enclosure
- Microprocessor based instrument
- Supports more than 3000 types of Electrodes with different applications
